POWER TO RUN YOUR BUSINESS

sage

Distribution

The Company

Gold Disk Computers Limited has been established as a limited company since 1998. The company specialise in the provision of IT solutions to meet your business requirements, harnessing the power that IT can bring through the effective use and application of solutions.

We are an IT service provider with a difference. "We only deliver IT solutions where a business benefit is proven" We're not interested in implementing IT for the sake of it but where you can reap and feel the benefit it delivers.

Gold Disk has successfully overseen and implemented some fifteen to twenty Tetra/Sage implementations, ranging from CS/3, Sage enterprise, Sage Line 500 sites all the way through to Sage 1000.

We prefer to deliver turn-key solutions that encompass companies' whole IT requirements where feasible. This ensures a "one-stop shop" approach to your problems and removes the typical buck passing that exists when several suppliers and vendors are involved. Your problems are viewed as our problems and the priority assigned to calls are based upon the impact on your business and not upon hard and fast rules about system status.

Choosing the right company to implement and support your IT needs is a key decision. You need to have the highest levels of confidence in the company you select. Our expertise lies in system integration based around Sage Line 500 and Sage 1000, whilst remaining flexible in a climate of constant change. We pride ourselves on our customer retention rate and this is a testimony to the level of customer driven support we offer and from understanding what you the customer requires from the product. With a focus on innovation, implementation and outstanding levels of customer support and service, GDC will provide the right solution for your business and a lifetime of the highest standards of after-sales care. We are committed to not only meeting your requirements, but exceeding them.

Reduce Costs & Increase ROI

In a world of spiralling costs, increasing competition from international trade and reduced availability to credit facilities its more important to ensure your business continues to deliver in what many analysts describe as "tough trading conditions". Depending on your business you may seek to reduce costs or simply deliver a greater level of service to your customer base. One thing that is always talked about but rarely concluded is the Return On Investment. It is necessary to ensure you have objectives and ensure these can be measured. This way you will know whether you have more improvements to make or the expected improvements were actually realised.

One way to achieve this and so much more is through the successful deployment of business solutions such as

- Sage 1000 – A Business management solution which Integrates ERP and CRM technologies into your business.
- Sage 500 – An industry tried and tested enterprise resource planning system for your business needs.

Both solutions deliver greater access to data and translate it to more meaningful information so you are in the know rather than the dark about what your business is doing. You can only make a decision once you are in possession of the facts, to do otherwise is simply taking a gamble.

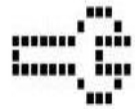

Maximise Support & harness your Solution.

If you already utilise the Sage product range then choose to use us. A business founded on Customer service and value added objectives; we can support your business and your chosen solution like no one else can:

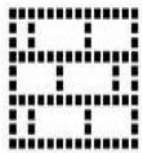

- We have outstanding levels of expertise
- Diverse skill sets that cover the cross-functional areas of your business and Sage.
- Consultancy & implementation services that is unrivalled.
- Project management that delivers on time and on budget.
- Application development that is modeled to support your business.
- Training with your business and products in mind.

Support is an inevitable cost which helps you to reap the benefits of your software to its potential. Unfortunately too many see this as just another revenue stream. Here at GDC we see you as a Company who have partnered with the same product that we have chose to and to that end we'll ensure we have an invested interest to mutually grow and develop together.

Changing support can unleash a whole new product and new opportunities. Contact us here at [Gold Disk Computers](http://www.golddiskcomputers.co.uk) on +44(0)1902 422613 or visit our website below for further information on how we can assist you.
